

## Sundolitt gains highest BRC certification for Glasgow site

Sundolitt is delighted to have been awarded the British Retail Consortium (BRC) AA+ rating for its Glasgow site. This is a significant achievement and the highest possible grade, only achieved through passing scheduled audits and also an unannounced audit. The BRC Standard largely relates to product safety and provides assurances to Sundolitt's customers that the company follows similar protocols to theirs, to ensure there is no contamination within the product. Currently awarded an A rating, the Fort William site hopes to achieve the same rating and the team are anticipating an unannounced audit later this year. Sundolitt sees this accreditation as an important message to its customers, showing the company's commitment to high standards of quality and hygiene.
